

Providing phenomenal cleaning services in Cincinnati since 2015

Apartment Community Disinfecting Services

As of March 2020, we are offering high quality disinfecting services to apartment communities and businesses in and around Cincinnati. Public entrances, elevators, mail boxes/rooms, stairwells, handrails are all places that viruses will be found frequently, and must be removed daily to ensure the best results of keeping community residents healthy.

Because we have increased costs with disinfection services (eye/mouth/hand protection, and more expensive chemicals), we are pricing disinfection services starting at \$63 for 1.5 hours. Because we are only disinfecting, not cleaning, we can get an *enormous* amount of public places completed in that time.

The owner will come do a walk through of your property and depending on what areas you want disinfected and how frequently, will be able to give a solid price quote.

We are available to disinfect 7 days a week. Weekend visits are typically an additional fee, however no additional charges for weekend visits if chosen frequency is daily (7 days a week).

ONLY month-to-month contracts for our disinfecting services, so you are not tied into anything long term.

*We strive to always use Spray Nine which is on the EPA approved list of disinfectants for killing viruses like covid-19 as well as germs. If not available, we will use a bleach-based disinfectant instead.
